

Dr. Jack Sternberg

**THEY ASK
ME TO
CURE
CANCER**

Hi! My name is Jack Sternberg, M.D. I'm a board-certified Medical Oncologist—a cancer treatment specialist.

And incidentally, I'm also Jewish.

Suppose I told you that I have found THE cure for all cancers? What if I told you it is extremely simple and that someone already paid for all cancer patients to receive it?

“TERRIFIC!” you'd say. “UNBELIEVABLE!”
“I CAN'T WAIT TO HEAR ABOUT IT.”

Your head would be spinning over the possibility of all the millions of lives I could save. Or, just maybe, you would be concerned with one or two people you don't want to live without. Or possibly you would find yourself filled with hope that your own life does not have to be cut short. Maybe you would tell me about your hopes and fears, or maybe you would just ask me what a person has to do to GET THE CURE for cancer.

But whatever you chose to say, just imagine if my response was: “Sorry. It's not for you. I'm not prepared to tell you what it is, share it with you, give it to you, or even sell it to you—or the world. I'm gonna keep it for myself and my family and only my very closest friends.”

What words would you scream at me? Selfish, self-centered, immoral, inhuman . . . maybe even other terms that should not be found in print.

Maybe you didn't even bother to imagine the scenario because you are smart enough to know that I haven't really found THE CURE for cancer. Maybe you already know if a thing sounds too good to be true, it isn't true. You'd be right to

**There is something
real, an epidemic even
deadlier than cancer and
*I can tell you the cure.***

avoid being gullible. Don't allow yourself to be cynical, though. Never give up hope, because you don't know when someone may actually discover THE cure for cancer.

In fact, there is something real, an epidemic even deadlier than cancer and I can tell you the cure. That scourge is something you have already heard of. It's called SIN (the wrongs we do that separate us from God Almighty). It works a lot like cancer.

Cancer happens when a cell goes wrong, and stops functioning the way it's supposed to as part of the body. Then it spreads—so that other healthy cells go bad and can't function. Cancer eventually spreads to the point where the victim's vital organs can no longer operate . . . and the victim dies.

Sin is similar, except all it takes is one “cell” to sicken the human spirit and make it impossible to live forever with God as we were meant to do. Spiritual sickness and the loss of eternal life with God in Heaven is about as bad as it gets.

But the good news is—there really is a cure.

Yet, when I try to share THIS cure, I am called all kinds of names. Traitor to my Jewish people. Narrow-minded. Simplistic. Stupid. And a lot of other things that I also better not put into print.

As a physician and a person of faith, I find it sad that the whole world would line up to hear the cure for cancer—a cure which I don't have—but few want to hear the cure for sin—which is readily available and yours for the asking. So, you would be mad at me for keeping quiet about one cure, but then also mad at me for telling you about the other? DUH!

I could not live with myself if I didn't at least try to tell you the cure: BELIEVE IN Y'SHUA (JESUS). He's the complete and permanent treatment for sin. His sacrifice is the pre-paid cure for that spiritual disease, and he wants to administer it to anyone who asks. After all, he is not called the Great Physician for nothing.

A present day cure for cancer would be wonderful, but wouldn't you really rather have the eternal cure and the life forever that goes with it?

**YOU CAN.
IT'S A GIFT
I WANT TO HELP
YOU RECEIVE.**

If you have a few moments, I'd like to share this cure with you more fully.

If you would like to know more about how I came to believe in Jesus, you can read a more detailed account at: <http://www.jewsforjesus.org/sternberg>
